Recommended Positioning

30° Stem

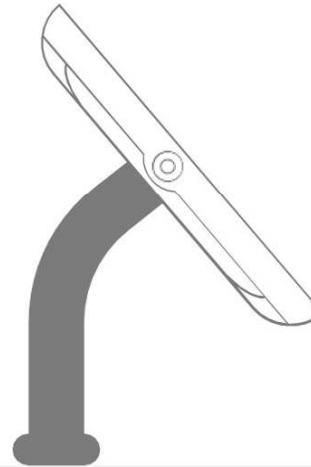

45° Stem

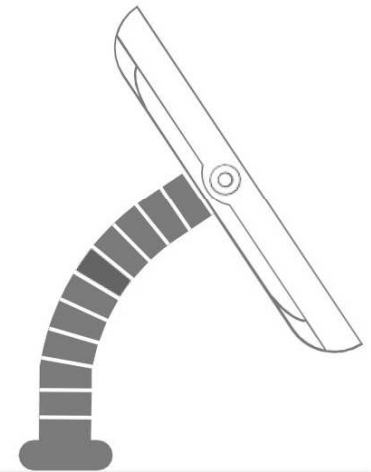

75cm – 90 cm

60° Stem

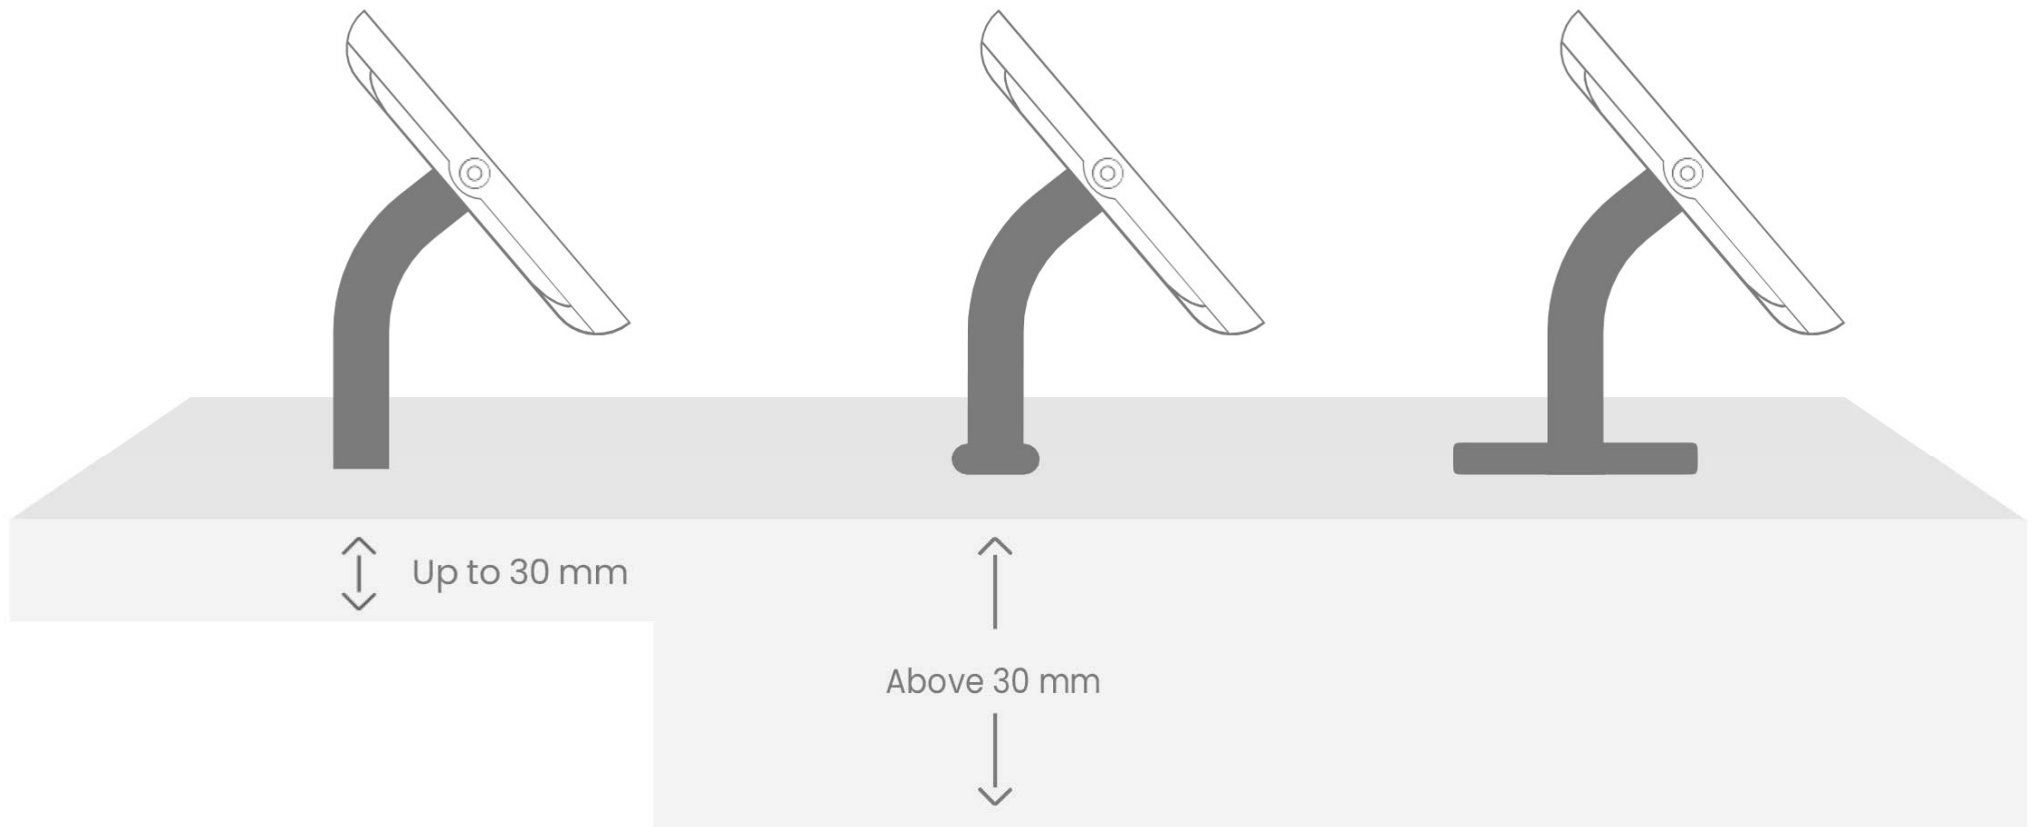

Flex Stem

90 cm – 110 cm

Installation Options

Under Counter

Requires drill holes and access beneath the mounting surface to create a seamless finish.

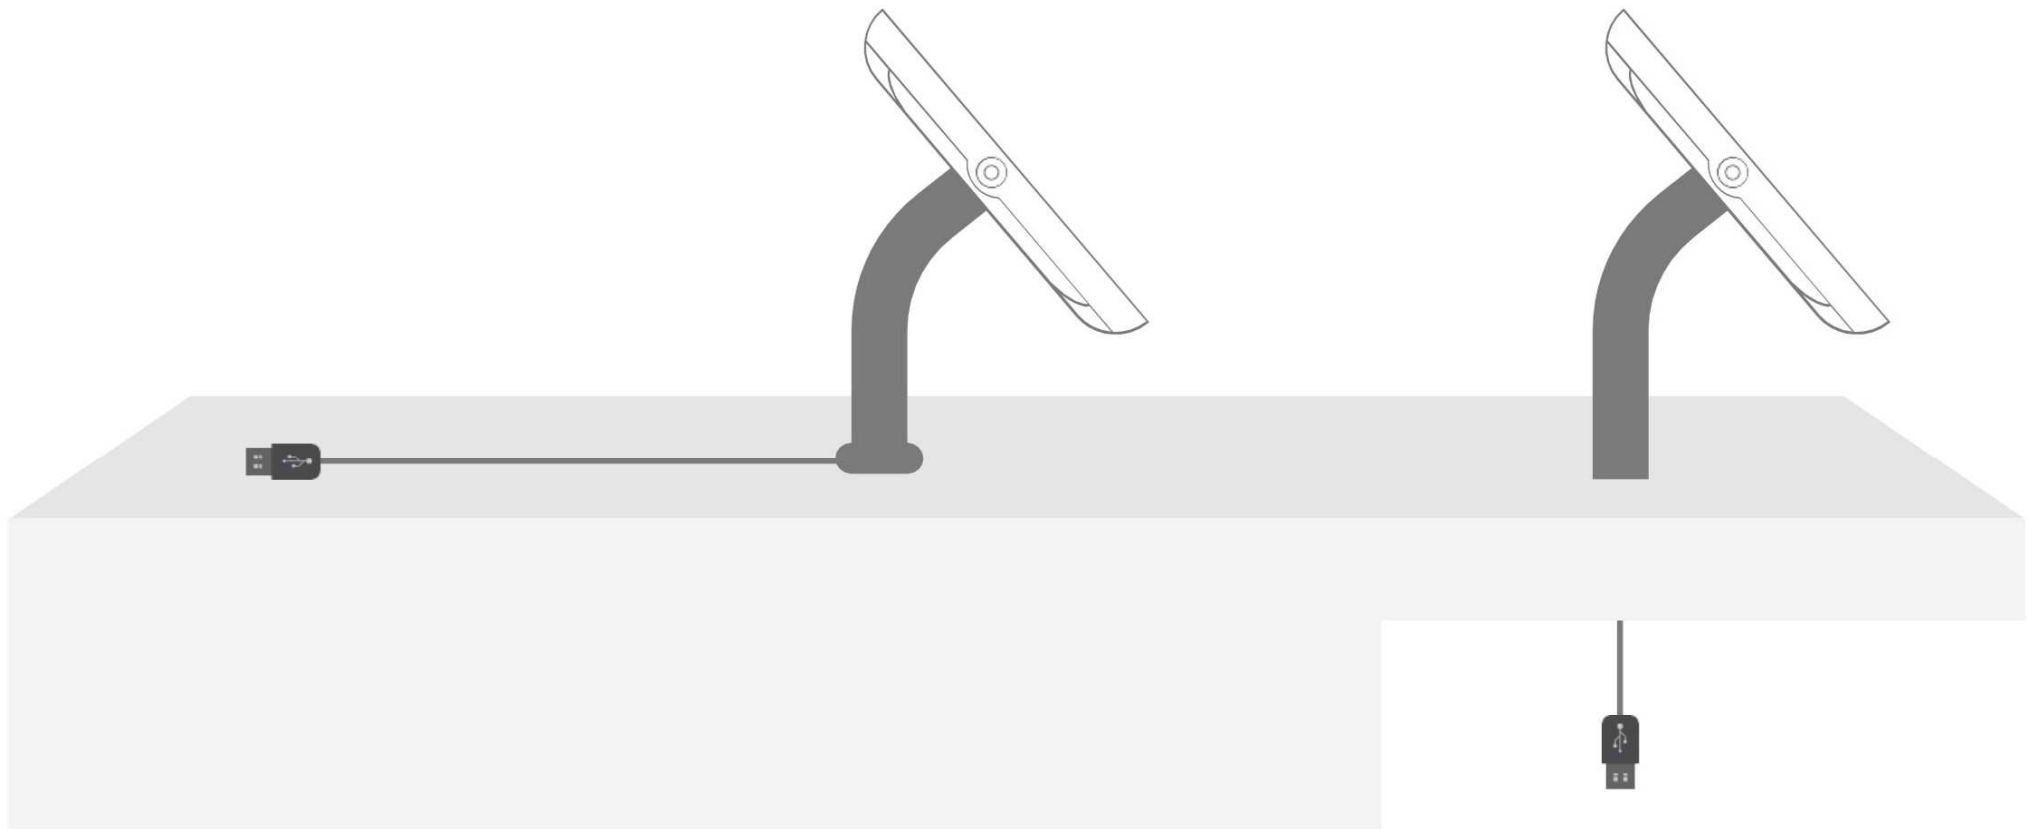

Surface

Screw down into your surface to fix your kiosk to a desk or table with an option to route cable along the countertop when there is no access underneath.

Freestanding

No need to drill holes in your furniture. Our sturdy base with rubber feet ensures a non-slip grip onto any surface while allowing easy mobility.

Cable Routing Options

Option 1

The charge cable can exit out the back of the base.

Option 2

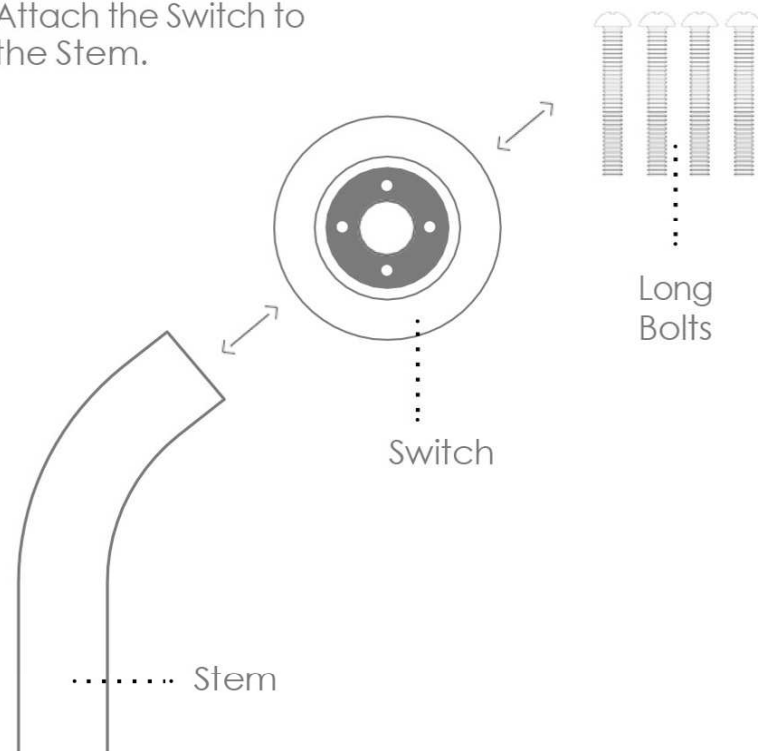

The charge cable can continue through the surface and exit underneath.

Switch Optional Upgrade: Landscape to Portrait

PLEASE NOTE: This is an optional upgrade. Please complete A and B below, then proceed to Step 2.
If you have not purchased this option, please proceed to assemble your kiosk starting at Step 1 (right).

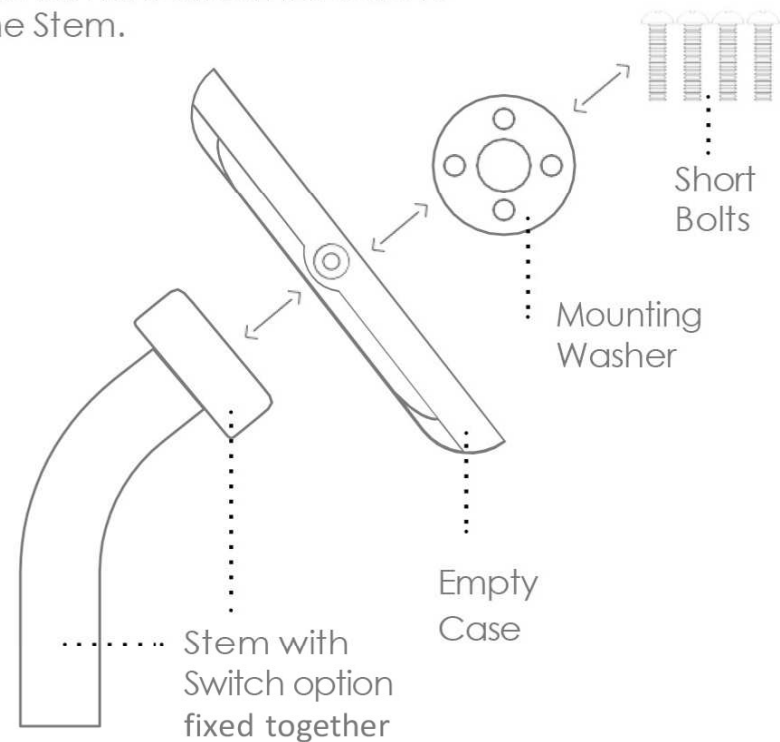

A.

Attach the Switch to
the Stem.

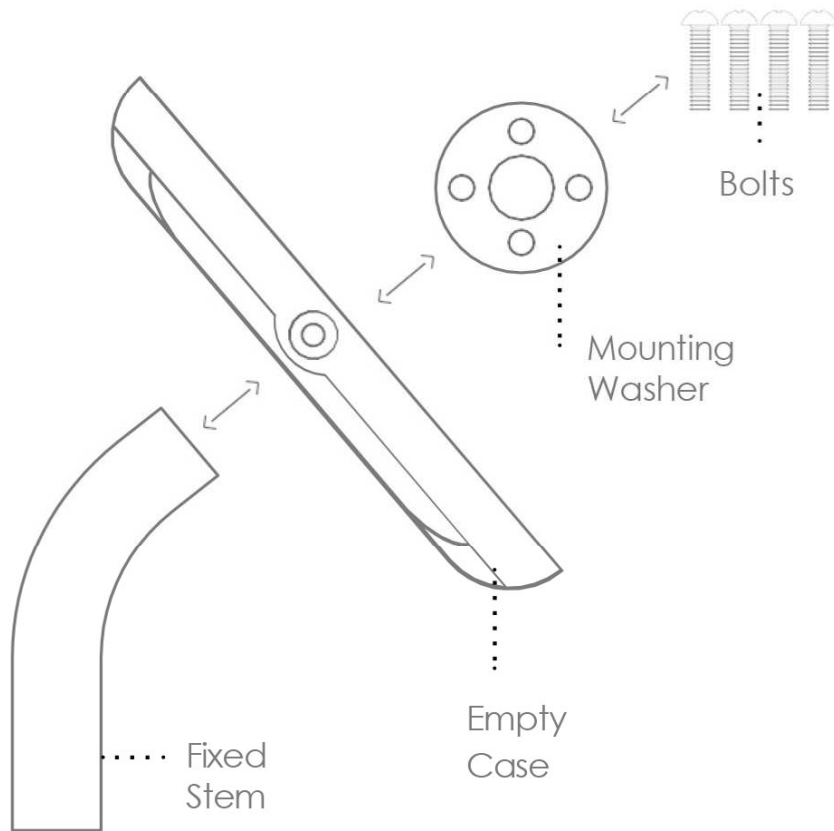

B.

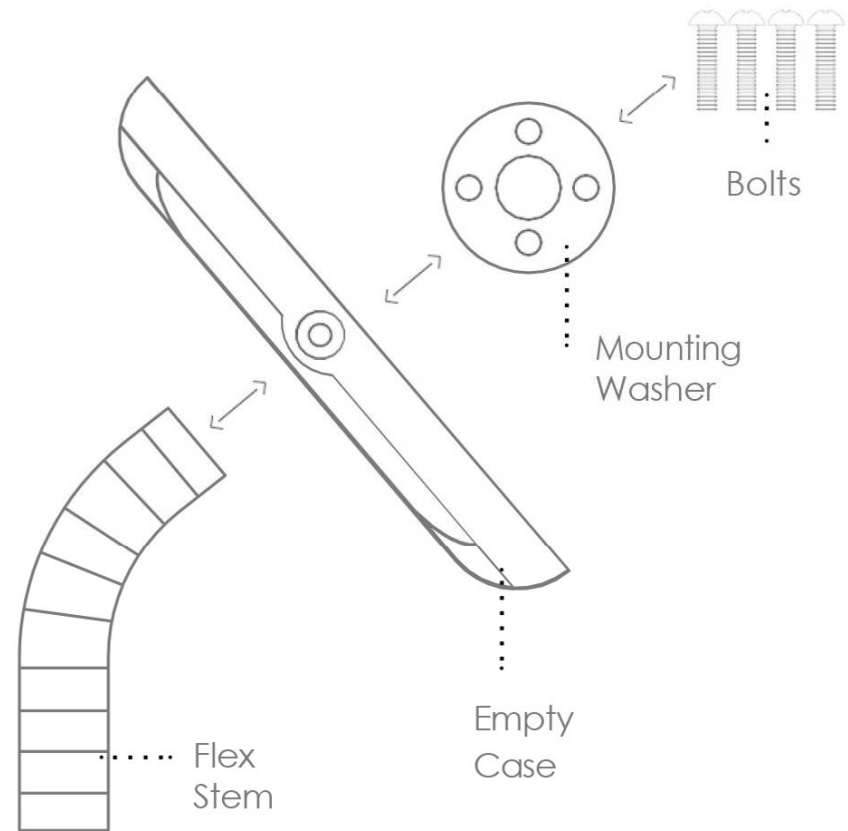

You can now attach the Case
to the Stem.

Fixed Stem

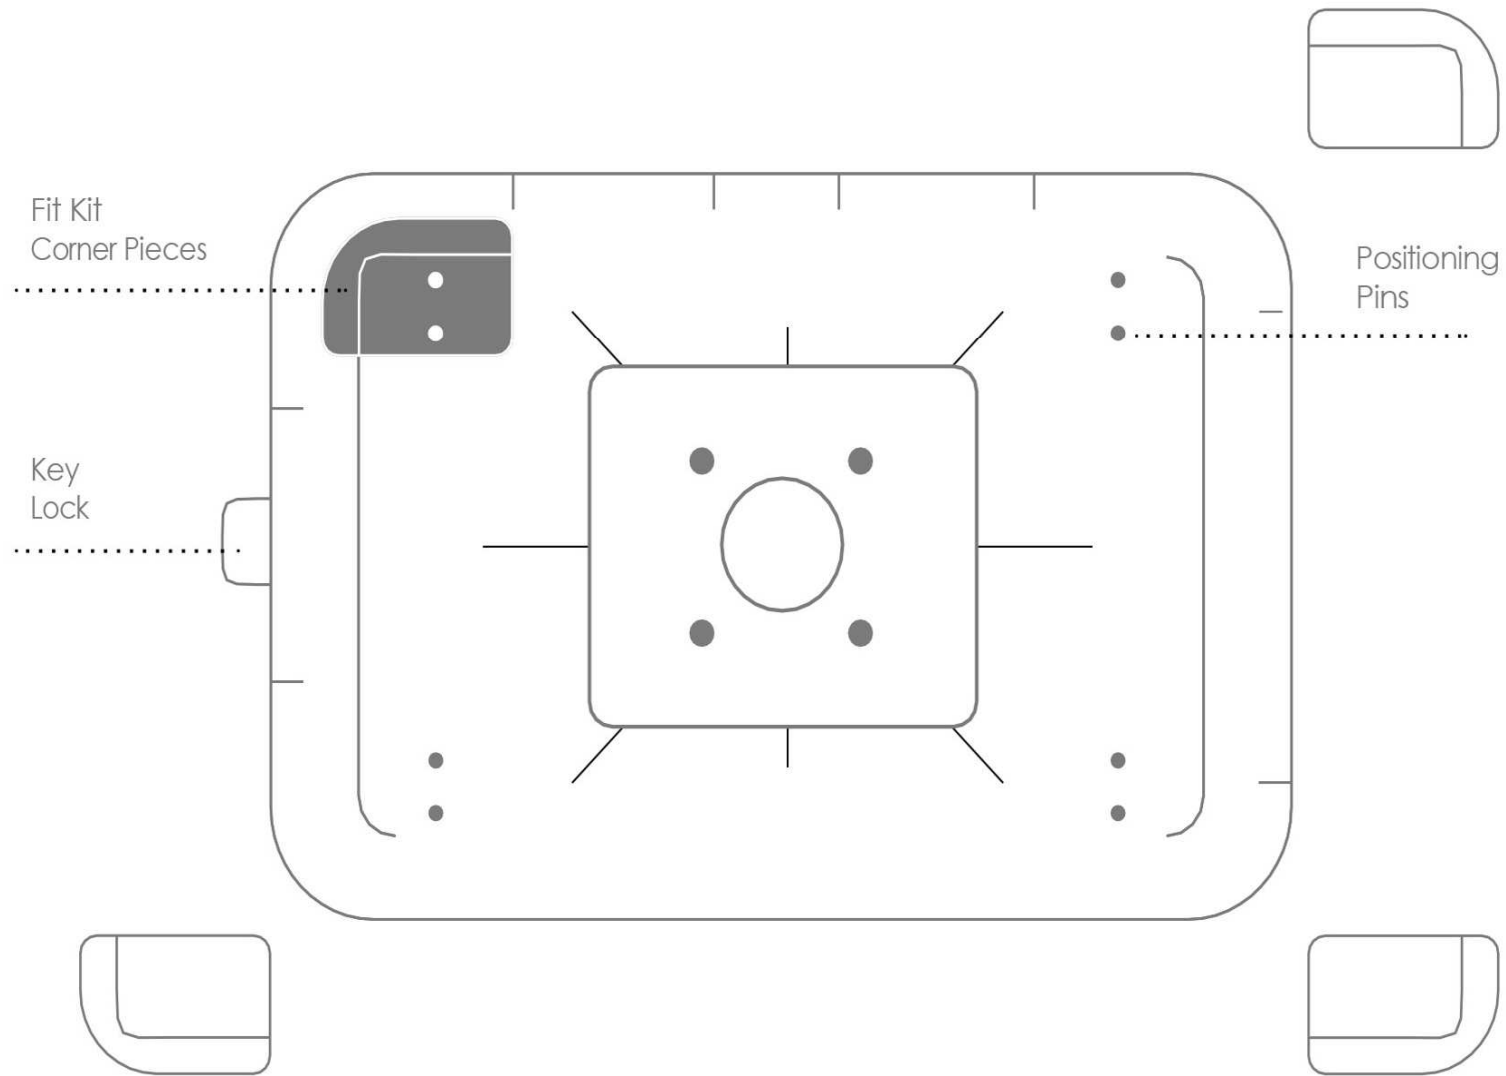

Flex Stem

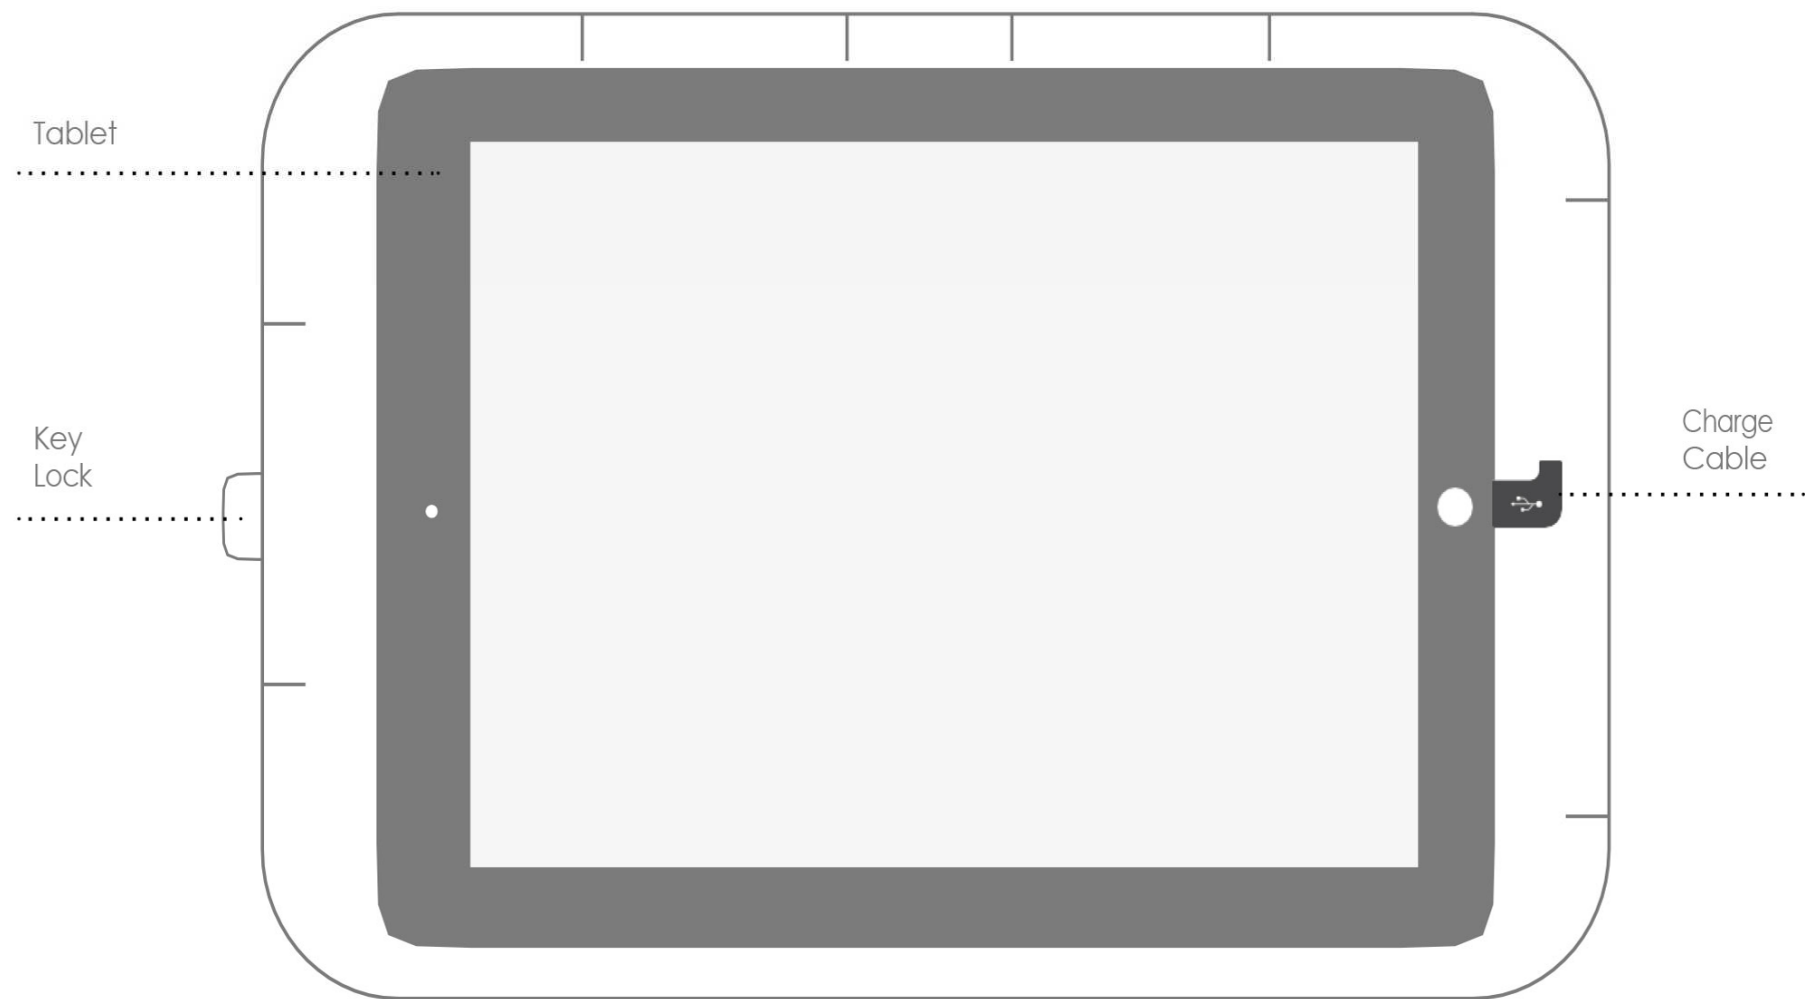

Attach the Case to the Stem by using the four bolts and the mounting washer to join together.

STEP 2 FIT KIT

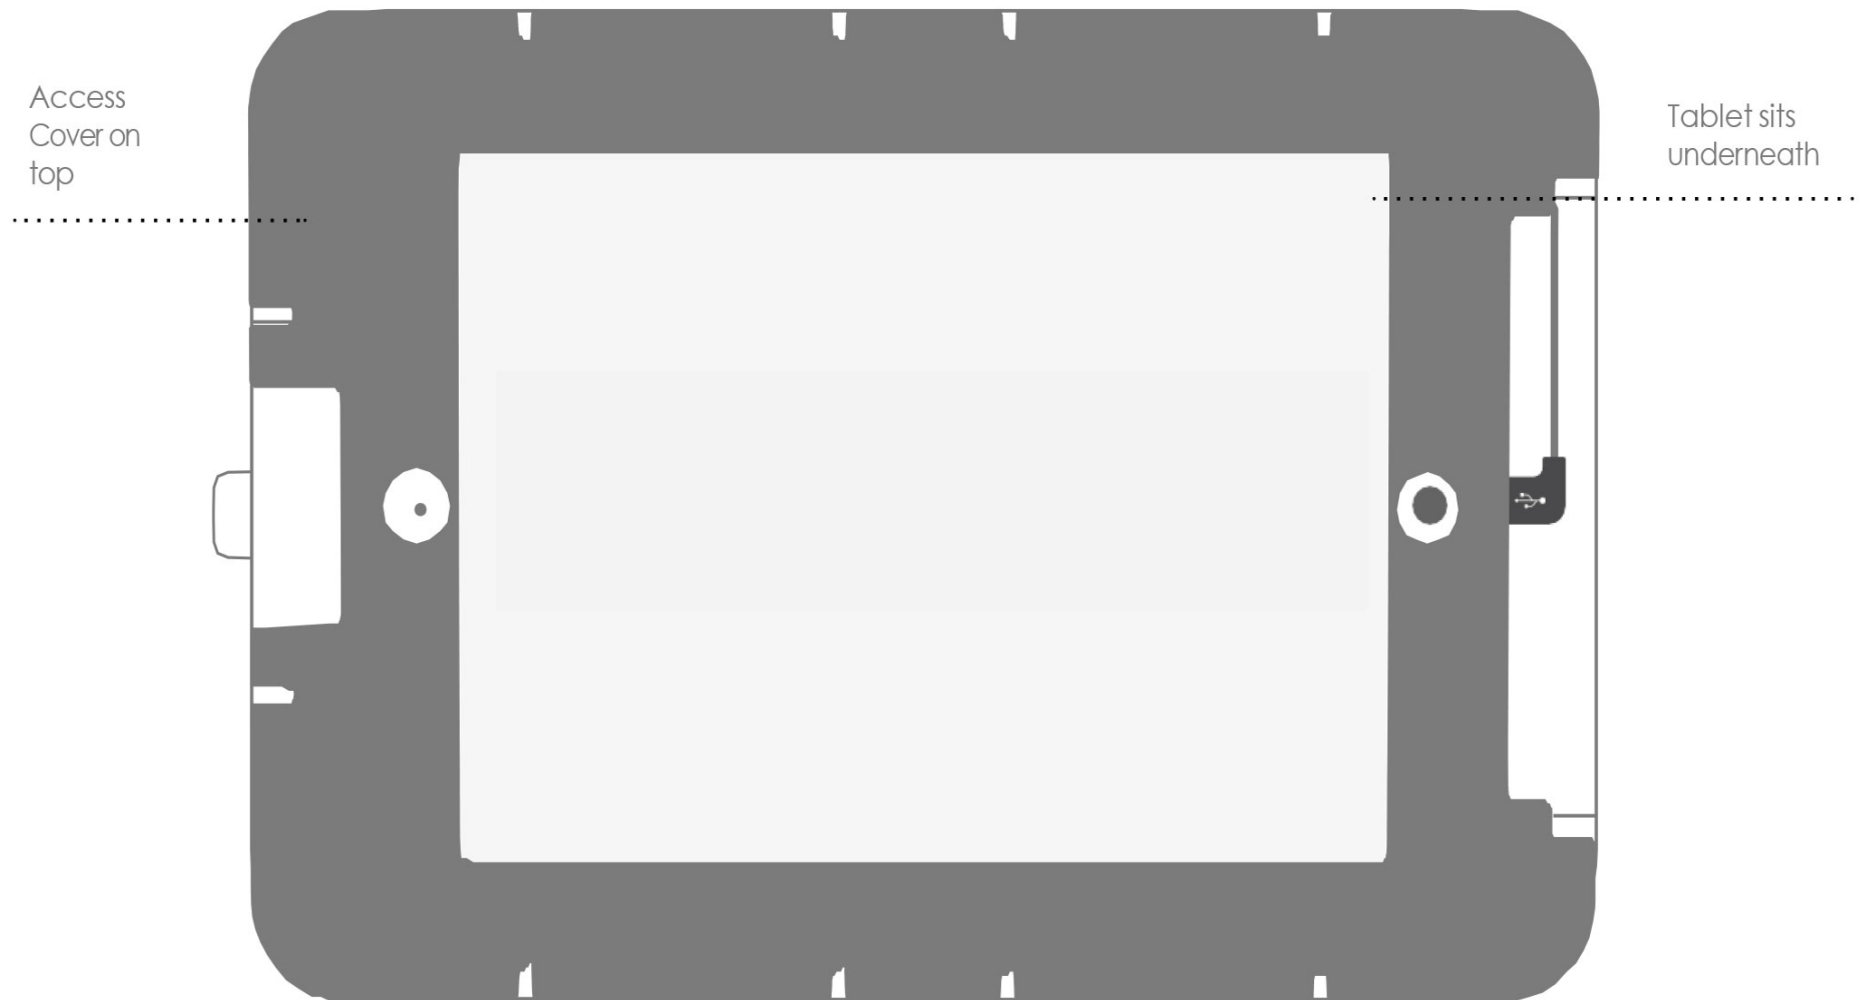

Firmly insert each of the four Fit Kit rubber corner pieces into the case by aligning with the Positioning Pins.

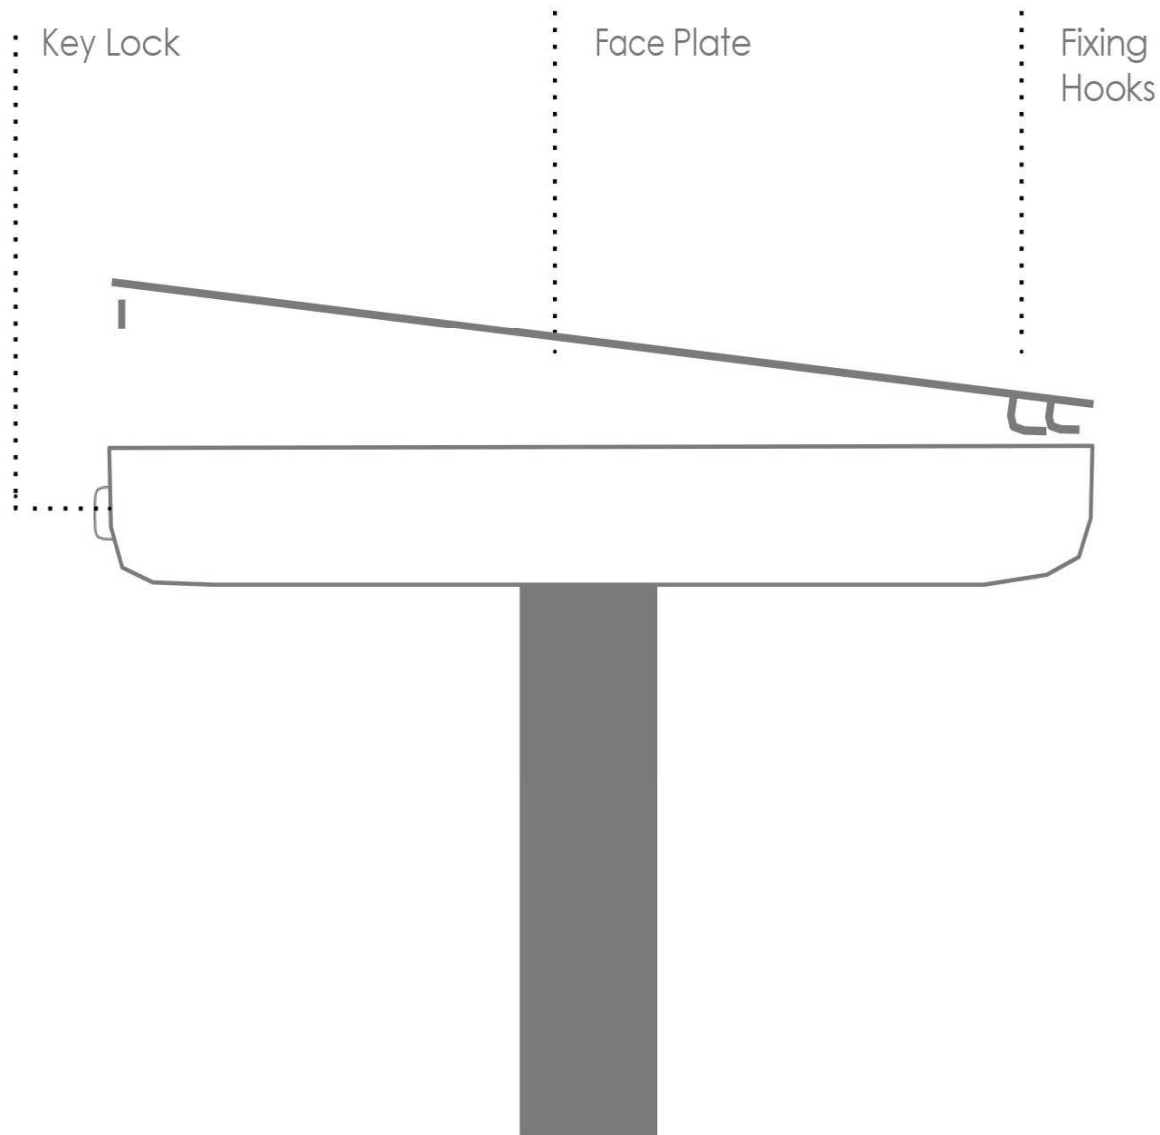

Connect the charge cable to the tablet, then insert your tablet into the Fit Kit corner pieces. It should sit neat and snug.

STEP 3 INSERT TABLET

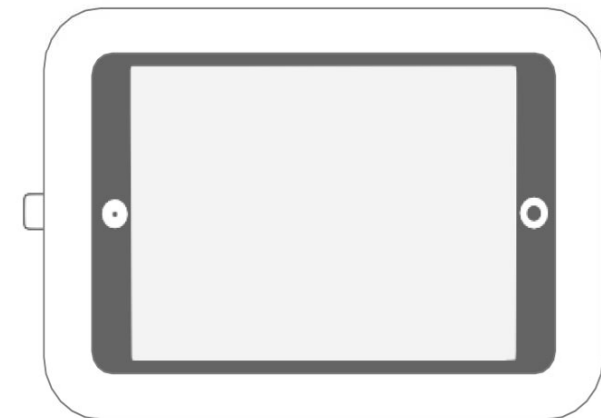

STEP 4 ACCESS COVER

First, peel the brown protective seal from one side of the Access Cover. Then insert the Access Cover over the top of your tablet with the black, shiny side facing up. It should fit precisely, allowing user access to your tablet home button and front camera (options available for any combination of Open and Closed; home button and front camera).

Example:

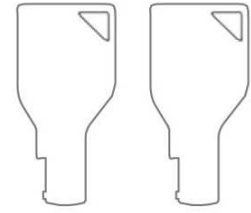

The last step is to lock-down the stainless steel Face Plate to secure and protect your tablet. First, position the two Fixing Hooks into the Case (opposite side of the Key Lock). Then pop in the other end. The Faceplate should click into the Case and sit flush.

STEP 6 PUSH TO LOCK

When the lock-pin stands out, it means your kiosk is open

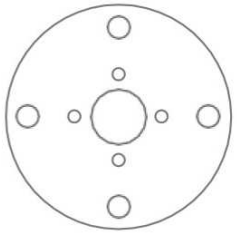

To secure your kiosk, push in the lock-pin

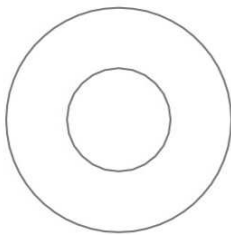

To complete the setup of your kiosk and ensure your device is secure, make sure to push in the lock-pin. To unlock use the 2 keys provided. More keys can be purchased from our website.

BOX INCLUSIONS
